Tiered Lodging Taxes in Kyoto and Trailhead Gates on Mount Fuji: Pricing Crowds During Japan’s Inbound Boom

Abstract. Weakening yen exchange rates pushed Japan past 36 million annual foreign visitors. Kyoto responded with progressive luxury hotel taxation up to ¥10,000 a night; Yamanashi and Shizuoka Prefectures paired a ¥4,000 trail fee with physical 2 p.m. gate closures. Empirical highlights: ¥10,000 (Kyoto’s top accommodation tax per person per night from March 1, 2026 (rooms ≥¥100,000)); ¥4,000 (Mandatory Mount Fuji climbing fee unified across all four Yamanashi & Shizuoka trails in 2025); 2:00 p.m. (Daily 5th Station gate closure on the Yoshida Trail to eliminate overnight 'bullet climbing').

JEL Classification: H27, H71, L83, Q26, R21 | **Keywords:** visitor levies, carrying capacity, short-term rentals, municipal finance

¥10,000 Kyoto’s top accommodation tax per person per night from March 1, 2026 (rooms ≥¥100,000)	**¥4,000** Mandatory Mount Fuji climbing fee unified across all four Yamanashi & Shizuoka trails in 2025	**2:00 p.m.** Daily 5th Station gate closure on the Yoshida Trail to eliminate overnight 'bullet climbing'

1. Kyoto’s progressive lodging tax: fiscal extraction without deterring domestic budget travelers

When Kyoto raised the top bracket of its municipal accommodation tax from ¥1,000 to ¥10,000 (~$66 USD) per person per night on March 1, 2026—following formal consent from Japan’s Ministry of Internal Affairs and Communications—it enacted the highest flat municipal lodging levy in Japanese history.[1] Yet the ordinance’s five-step structure leaves the bottom bracket (stays under ¥6,000 per person, typical of school excursions, hostels, and domestic business hotels) untouched at ¥200, while raising mid-market rooms (¥6,000–¥19,999) by only ¥200.

That design reflects an explicit political and economic calculation. In Kyoto, public anger centered on overcrowded municipal buses to Kiyomizu-dera and Arashiyama, where transit fares had been held flat for residents while luxury international hotel chains expanded rapidly on former institutional land. Because high-end foreign leisure guests paying ¥120,000 ($800) per night for a luxury ryokan or five-star hotel exhibit low price elasticity, a ¥10,000 per-person charge is projected to more than double Kyoto’s annual accommodation-tax revenue toward ¥12.6 billion (~$83 million)—funding dedicated express tourist buses and luggage-forwarding subsidies—without pricing out Japanese domestic students.

Table 1. Kyoto City's revised five-tier per-person nightly accommodation tax schedule (effective March 1, 2026)

Nightly room rate per person (pre-tax)	2018–Feb. 2026 tax	From March 1, 2026	Approximate effective tax rate
Under ¥6,000	¥200	¥200 (unchanged)	3.3% at top of bracket
¥6,000 to ¥19,999	¥200	¥400	2.0% to 6.7%
¥20,000 to ¥49,999	¥500	¥1,000	2.0% to 5.0%
¥50,000 to ¥99,999	¥1,000	¥4,000	4.0% to 8.0%
¥100,000 and above	¥1,000	¥10,000	≤10.0% (declining above ¥100k)

2. Mount Fuji's paired price-and-gate experiment (2024–2026)

On Mount Fuji, where over 60 percent of climbers use Yamanashi Prefecture's Yoshida Trail, prefectural officials combined a fee with two hard physical rules. In July 2024 Yamanashi introduced a mandatory ¥2,000 entry fee, capped non-hut hikers at 4,000 per day, and installed a physical wooden gate at the 5th Station that closed from 4:00 p.m. to 3:00 a.m. unless a climber held a confirmed overnight mountain-hut reservation.[2]

First-season data from summer 2024 exposed a spillover risk: while Yoshida Trail ascents fell roughly 14 percent from 2023 and late-night 'bullet climbing' rescues dropped markedly, climbers migrated to the three uncharged trails on the Shizuoka Prefecture side of the volcano. In response, Yamanashi and Shizuoka coordinated ordinances for the 2025 season (retained in 2026): all four trails now charge a mandatory ¥4,000 fee, Yamanashi moved its afternoon gate closure two hours earlier to 2:00 p.m., and Shizuoka barred post-2:00 p.m. entries for hikers without hut bookings.[2]

3. Why time-of-day gates succeeded where fees alone would not

Mount Fuji's two-stage rollout demonstrates a core principle of fragile-site management. At ¥4,000 (~$26 USD), the climbing fee easily pays for English-speaking trail rangers, safety helmets, and high-altitude shelters, yet on clear August weekends the 4,000-climber cap and the 2:00 p.m. curfew—not the fee—prevent summit-crater bottlenecks at sunrise. Closing the Shizuoka backdoor in year two also illustrates why single-gate caps on multi-access natural sites require inter-jurisdictional coordination from day one.
